User Stories:

1 M

1. As a new user, I want some free **token**, so I can request a **favor** without offering one before.
2. As a user, I want to view the **profile** of other users, so I can know the person's characteristics (e.g. skills and personal information) before we get in touch.
3. As a user, I want to see the reviews about the **advertisers**, so I can know their reliability reading other opinions.

1 D

- As a beta tester, I want to use a feedback system, so that I can let developers know my opinion about the software;
- As a veteran user I want to have a favourite user list, so that I can remember who are the best users in my experience;
- As a new user, I want to have a tutorial, so that I may learn how to use the software;

1 L

- As a moderator, I want to have the possibility of banning an account, so that I can expel the users with bad behavior.
- As an **advertiser**, I want to publish ads, so that I can inform the other users that I need or I can offer a favor.
- As a user, I want to know the location of the advertiser, so that I can know which ones are in my local area, 10 km at most
- As a user, I want to filter the search of ads, so that in my search there aren't unwanted results.

Favor = A service that users can request or offer, through the use of **tokens**.

Token = It's the currency used to exchange services between the users.

Advertiser = The user that request or offer a service.
